REPORT  
/   
OF THE  
BOARD OF MANAGERS OF THE CHILDREN'S HOSPITAL  
FOR THE YEAR 1863.

PRESENTED TO THE CONTRIBUTORS AT THEIR ANNUAL MEETING, JAN. 8, 1864

---

THE Board respectfully present herewith the Reports of the attending Physicians and of the Treasurer, in which full information will be found in regard to the operations of the hospital during the year 1863.

The contributions and donations amounted to \$1492 50, which is slightly in excess of the previous year.

The expenditure of the hospital has amounted to \$2472 53. This cannot probably be in any way diminished without impairing the efficiency of the hospital. The total income from sources which can be applied to the expenses of the household was

Contributions and donations . . . . .	\$1492 50
Proceeds of benefit . . . . .	155 76
Board of patients . . . . .	21 00
Interest on investments . . . . .	589 19
	<hr/>
	\$2258 45

Showing an actual deficiency in the ordinary income of the hospital to meet its expenses of \$214 08.

Undoubtedly the increase of income from donations and contributions has been affected by the direction of the liberality of contributors to the building fund, which now amounts, valuing the real estate at cost, to \$16,791 33, the additional \$1000, represented in the Treasurer's account, consisting of an item of \$1000, proceeds of an investment of the general funds of the Hospital which was transferred to that account.

But it is proper to call attention to the fact, that although temporarily the revenue of the building or Permanent Fund can be applied to the expenses of the Hospital, yet both the representations under which the greater part of the fund was obtained, as

well as the true interest of the charity, require that the building should be prosecuted at an early day, and when that is done, not only will the revenue from that source fail, but probably a somewhat increased expenditure will be necessitated from the increased demand for accommodation of indoor patients.

These views are expressed not from any fear or discouragement as to meeting the future expenses of the Hospital. The managers have by experience been taught that it requires only a notice of their wants to meet with a ready response from the contributors to the Hospital.

Unless the price of building materials should further advance, the building will be commenced in the spring. A lot in a very advantageous position on the east side of Twenty-second Street above Loenst Street, with a front of over seventy-five feet, has been obtained at a very reasonable price, and paid for. Of the purchase money, the very liberal sum of \$2500 was contributed by the owner of the land and his immediate family.

A very handsome contribution of \$5000 has also been received from two contributors, to be applied to the building. The subscription was conditional, on the Board and their friends obtaining subscriptions from other sources to such an amount as would raise the other funds of the Hospital applicable to building purposes to \$15,000. The amount has been raised and the subscription paid.

The Board, however, will not be tempted into building unless they can see their way clear to accomplish this object without incurring any indebtedness. They believe they will be more fully carrying out the spirit of their engagement with the contributors to the Building Fund, by abstaining from building, if the rise of prices should render the sum in hand insufficient, than by acting up to the letter of their representations, and imperilling the permanency of the Charity by incurring a debt. Indeed, they urge that prudence requires an increase of the Building Fund proper to \$20,000 independently of other funds, so as to allow the investments of accumulated funds to remain untouched. The propriety of this needs no remark.

The Board have to express their thanks for the zeal of the Attending Physicians, and the continued attention of the Matron, Miss Mary McGladery, and the Board of Lady Visitors to the wants of the household.

GEORGE W. NORRIS,  
*President.*

ANNUAL REPORT  
OF THE  
ATTENDING PHYSICIANS,  
FOR 1863.

PRESENTED TO THE BOARD OF MANAGERS, JANUARY 8, 1864.

---

THE business of the Hospital during the past year shows a slight increase over that of 1862.

The admissions were ninety-nine. The discharges and deaths eighty-eight—sixteen remain under treatment. The Dispensary patients number 1906, who have attended 4561 times for medical advice.

In accordance with the recommendation of the Managers at their last annual meeting, no visits have been made to children outside the Hospital.

As the subject of a change of location and the erection of a new hospital building is now occupying the attention of the Board, we cannot too strongly urge the necessity which exists for speedy action in this matter.

The annexed summary of the business of the Hospital during the eight years since its opening presents some significant facts showing the tendency of the present working system in its relations to the indoor and outdoor departments of the Institution.

Placing side by side the numbers treated during these years both in the wards and at the Dispensary as in the accompanying abstract:

	Hospital.	Dispensary.
1855-6	. . . . 67	. . . . 306
1857	. . . . 90	. . . . 593
1858	. . . . 84	. . . . 801
1859	. . . . 124	. . . . 1226
1860	. . . . 133	. . . . 1418
1861	. . . . 71	. . . . 1704
1862	. . . . 90	. . . . 1827
1863	. . . . 104	. . . . 1906

it is obvious that the Dispensary has steadily and largely increased, while the indoor work of the Hospital has not; or, in other words, the main end and design of the Hospital—the proper and efficient treatment of the sick children of the poor—has not been fully answered.

Of the causes which tend to maintain this comparative lifelessness in the indoor business, we need not speak at length, as they are well known to the Board, and have hitherto been inevitable. Still, as year by year goes over the Hospital without a proper opportunity afforded for its development, it is to be feared that this enforced stagnation may interfere with its ultimate success, or at all events serve greatly to retard it.

The experience of these years fully justifies our apprehensions long since expressed, that no marked improvement in this respect can take place with the present drawbacks of restricted accommodation and imperfect internal organization. For these reasons, and mainly because we have no resident medical officer to receive and bestow upon them that prompt attention which their urgency requires, a very large class of important cases of accident and acute diseases is practically excluded from the wards of the Hospital. Hence many of such patients find their way into the General Hospitals, or receive precarious and unsatisfactory attendance at their homes; in either case for want of special provision made in their behalf failing to get the extra care and nursing so much needed in children's ailments.

For these very emergencies of sickness our Hospital was originally intended, and yet although not a few such cases have been successfully treated in its wards, it must be allowed that until ample accommodation be furnished and a resident physician appointed, the great bulk of cases received must continue to be of chronic diseases. As a full measure of success in these respects is clearly not attainable under present circumstances, we trust that the time is not far distant when it may become practicable to complete these necessary arrangements.

Notwithstanding these unavoidable difficulties, the result thus far affords encouraging promise of the future growth of the Hospital so soon as they shall have been removed.

As in previous years, the household has been well and carefully managed by the ladies and the matron.

The annual expenditure, notwithstanding the increased price of

provisions and other necessaries, only exceeds that of 1862 by \$408 75, which, considering the greater amount of business done, shows a most economical outlay.

The excellent system practised by the ladies visiting and the matron has greatly contributed to this result, and we take much pleasure in witnessing to its efficiency.

FRANCIS W. LEWIS,  
R. A. F. PENROSE,  
JAMES H. HUTCHINSON,  
HILBORNE WEST,
